

Plan for advancement with "Der Berg ruft!" ("The mountain is calling!")

Compact consulting packages from itelligence optimize IT and reduce costs

Bielefeld (Germany), June, 16 2009 – "Plan for the upturn", warn the analysts from Gartner in a recently published study. The SAP consulting house itelligence wants to do exactly that, paving the way for its customers by offering 40 innovative, very compact consulting packages under the title "Der Berg ruft!" on its Internet site www.itelligence.de/derbergruft.

With "Der Berg ruft!", customers can choose from two categories: packages for cost reduction and securing of liquidity as well as solutions for optimizing and increasing effectiveness. For quick orientation, each category is divided into four business areas: Logistics/Production, Sales, Order Processing and IT Operations. In particular, itelligence wants to be measured by the efficiency and quality of these offerings.

Dr. Andreas Pauls, itelligence Sales Manager for Germany and Austria comments about this approach: "These packages offer the company a measurable advantage from day one."

The majority of the packages, which support the motto "Those that charge to the peak can move mountains", range from €1,900 to €10,000. For some, there is even a special offer: The SAP consulting house only receives the full amount of the agreed upon payment when the effects worked out with itelligence have been achieved.

As a new offering, the Fast-Close package ensures a significant reduction in the time required for creating monthly and annual financial statements within companies, for example. A further example is the package for automatic processing of financial correspondence per fax and e-mail for €2,000. Not only does this save time, the package also permits substantial cost savings through the elimination of paper, printing, enveloping and postage costs.

itelligence Press Release

Der Berg ruft! – plan now for the upturn

Compact consulting packages from itelligence optimize IT and reduce costs

But more complex consultation packages are also being offered – for example, inventory optimization for €10,000. Here, the effects extend to the inventory situation and lead to a release of capital tied up there. In addition, inventories can be continuously monitored and optimized.

itelligence has tailored the consultation package "Der Berg ruft" for German-speaking countries. Detailed information about the package is provided at the Internet site www.itelligence.de/derbergruft.
